High Deductible Health Plan 2024

Right here.
For you.

Understanding the Base Health Plan

A high deductible health plan may work a little differently than other health insurance plans you have had in the past. A high deductible health plan or “HDHP” is designed to help keep premium costs lower for you and your family.

You will have coverage for things like:

- Choice of doctors and hospitals
- Doctor visits
- No-cost preventive care
- Hospitalization
- Laboratory coverage
- Maternity and newborn care
- Prescription drugs
- Specialty care
- Telemedicine and telehealth visits
- Urgent care visits
- VitalizeSM health and wellbeing benefit, powered by Virgin Pulse
- Pediatric vision and dental

Let's start with the basics:

Your first three visits to a primary care (PCP) or specialist doctor (SPC) are covered ahead of the deductible (you just pay a copay).

FREE preventive care - Preventive care can help you avoid getting sick and improve your health. With an HDHP, preventive services such as routine physicals, screenings and vaccinations are covered in full.*

Deductible applies - The deductible is the amount you have to reach first for all other medical services, like going to the doctor when you are sick (after your first 3 PCP or SPC visits) or if you have to go to the hospital. Your deductible amount may vary and is based on the type of plan you have. The deductible does not apply to preventive services. They are covered in full from the first day your coverage begins. Once you reach your deductible, you pay a fixed copay depending on the service, and we pay the rest.

*In accordance with the PPACA preventive care regulations, full coverage (no cost share) will be applied for those services meeting the requirements as outlined in Grade A and B Recommendations of the United States Preventive Services Task Force.

How this works

Preventive Services

We pay
100%

Preventive care is covered in full, so we provide full coverage. You do not need to meet your deductible first.

Other Services

Your first 3 services provided by your PCP or SPC

You pay a
COPAY

We pay the
REST

Your first 3 PCP or SPC services are not subject to the deductible, so you just pay a copay.

Until deductible amount is reached:

You pay
100%

For all other services, you pay a deductible up to a certain amount.

After deductible amount is reached:

You pay a
COPAY

We pay the
REST

Once the deductible amount is reached you pay a fixed copay depending on the service, and we pay the rest.

Example:

Let's say your deductible is **\$4,600**.

You go to your primary care doctor because you are not feeling well. Because your first 3 visits are covered ahead of the deductible, **you pay your \$50 primary care copay**.

Your doctor orders an MRI of your lower back. **You pay \$1,000 for the MRI. You still have to pay \$3,600 more to reach your deductible.**

After a series of visits to your doctor and a chiropractor, **you have \$0 left to reach your deductible**. Now you will pay a fixed amount, **called a copay**.

If your specialist copay is \$75, and the next time you visit your doctor **your bill is \$200**, then **you will pay \$75 and we will pay the rest (\$125)**.

- Health insurance company pays
- You pay

Remember preventive care is covered in full and is not subject to the deductible. So you have free coverage for things like your annual physical.

Note: For illustrative purposes only - plan options vary.

The top 4 things to know

1 What benefits are free?

- Preventive care for you and your family is covered in full on the first day your coverage begins.

2 Does my plan have a deductible? If so what does it apply to?

- Yes, this plan has a deductible.
- The deductible will apply to all medical care and prescription drugs, including diabetic drugs and supplies.
- It does not apply to your first 3 visits to your PCP or SPC (copay will apply).

3 How does the money I pay toward my deductible add up (or aggregate)?

- Each person only has to pay their own individual deductible. Once an individual meets their deductible, the plan begins paying on their claims.
- When covering more than one person, the family deductible is met for everyone on the plan once any combination of members reaches the family deductible amount.

4 How much will I pay out-of-pocket for this plan? And how does it add up (or aggregate)?

- All of our plans have a maximum amount that any one person will pay called an Out-of-Pocket Maximum (OOPM).
- Just like with the deductible, each person will only have to pay their own OOPM amount. Once that amount is reached, care is covered in full for that person.
- When covering more than one person, care is covered in full for everyone once any combination of members reaches the family OOPM.

Important terms to know

Deductible

The amount of money you have to pay before we will make any payments toward health care services. Your deductible amount varies and is based on which of these plans you have.

Copayment (or copay)

This is a fixed dollar amount you pay for covered health care services. We cover the rest. For example, your doctor visit costs \$100. You pay \$20 for the visit. We cover the remaining \$80. If you haven't met your deductible: You pay the full \$100.

Please note: Copay amounts can vary for different services depending on your plan.

Coinsurance

Your share of the costs of a covered health care service, calculated as a percent. Coinsurance is similar to a copay, but instead of a fixed dollar amount, it is a percentage of the total bill. For example, if your daughter's eyeglasses are \$100 and you've met your deductible, your coinsurance payment of 50% would be \$50. We would pay the rest, or \$50.

Covered in full

100% of the total cost is covered by us and you do not have to pay anything.

Out-of-pocket maximum

An annual limit on the amount of money that you would have to pay for health care services, not including your monthly premiums.

Benefits you can count on.
