

Platinum Select Copay

2025

Right here.
For you.

Understanding how it works

A copay plan is a type of health insurance plan that offers you predictable out-of-pocket costs for most covered health care services. The plan is designed to meet the needs of individuals and families.

About the plan:

FREE Preventive care can help you avoid getting sick and improve your health. With a copay plan, preventive services such as routine physicals, screenings and vaccinations are covered in full.

For services other than preventive care, you are responsible for paying a flat dollar amount for most medical services, like going to the doctor when you are sick or getting a prescription filled. And since you do not have to meet a deductible first, you pay a copay for most covered services on the first day your coverage begins.

To help with your costs, there is an out-of-pocket maximum that limits how much you have to pay out of your own pocket for health care services each year, not including monthly premiums. If you reach that maximum out-of-pocket amount, your care is covered in full.

You will have coverage for things like:

- Hospitalization
- Maternity and newborn care
- Urgent care visits
- No-cost preventive care
- Doctor visits
- Specialty care
- Prescription drugs
- Laboratory coverage
- Choice of doctors and hospitals
- Telemedicine and telehealth visits
- VitalizeSM health and wellbeing benefit in partnership with Personify Health
- Pediatric vision and dental
- Adult eye exams and dental (preventive and routine)

To help you understand your plan, this brochure provides explanations and examples.

Important terms to know

Copay - This is a fixed amount you pay each time you use a medical service, such as a doctor's office visit, prescription refill or a hospital stay. For example, let's say your coverage includes a \$20 copay for a doctor's office visit. You go to your doctor for strep throat, you pay \$20 at the time of your visit and we pay the rest.

Coinsurance - Your share of the costs of a covered health care service, calculated as a percent (for example, 20%). For example, let's say your child's eye glasses are \$100. Your plan covers 80%. So, your coinsurance payment of 20% would be \$20. The health insurance company would pay the rest or \$80.

Covered in full - 100% of the total cost is covered by the health insurance company and you do not have to pay anything.

Deductible - The amount of money you have to pay before we will make any payments toward health care services.

Out-of-pocket maximum - A specific amount that limits how much you have to pay out of your own pocket for health care services during a particular time period, not including monthly premiums.

The top 3 things to know

1 What benefits are free?

- Preventive care for you and your family is covered in full on the first day your coverage begins.

2 Does my plan have a deductible? If so, what does it apply to?

- No, this plan does not have a deductible.

3 How much will I pay out-of-pocket for this plan? And how does it add-up (or aggregate)?

- All of our plans have a maximum amount that any one person will pay called an Out-of-Pocket Maximum (OOPM).
- Each person will only have to pay their own OOPM amount. Once that amount is reached, care is covered in full for that person.
- When covering more than one person, care is covered in full for everyone once any combination of members reaches the family OOPM.

Benefits you can count on.

More access

Many providers — a large network of hospitals and doctors from Buffalo to Rochester accept our plans.
